Lesson 17 Describing Contradictory Ideas -In Class-

【English】

Teacher : So how would you graph this? Anyone knows?

Teacher : Yes, OK, Erin. Can you write it on the blackboard?

Teacher : That's it. Correct.

Saki : Hey, Erin, are you good at math? Isn't it difficult?

Erin : Um... it's difficult but... interesting.

Saki : Yeah? I don't know about that... I'm hopeless at math.

Teacher : Hey, over there! Fujioka! What are the coordinates of the vertex of this graph?

Saki : That's, ah ...

Erin : X is -1, and y is -4.

Saki : X is -1, and y is -4.

Teacher : Right, that's correct.!

Teacher : Good job, Erin!
